I think that would be great if they are needed. Thank you for thinking of it.

Subject: fyi only on-site IT support for Durango.

I chatted with Paula last night about the printer. We are evaluating whether they should just go purchase one or perhaps we have one in inventory we could overnight. Paula was going to circle back today after she arrived and let me know.

I'd like to put on your radar the possibility of sending one of our IT support to Durango. We are checking in with colleagues deployed in Durango to see how things are going, starting with Paula. Haven't mentioned this to anyone outside our group yet. Let me know if you have thoughts on this.

Thanks.

Matt Duran
